Phase I: General Business Guidelines

All businesses identified as eligible to operate under Phase I must prepare and implement a COVID-19 Control Plan in accordance with emergency regulations to be promulgated by the Rhode Island Department of Health.

The guidelines provided within this document are provided to assist businesses in meeting the requirements outlined in these RIDOH regulations. Businesses that re-open under Phase I must comply with these RIDOH regulations before re-opening, and businesses that are currently open (as of 5/6/2020) must comply with these measures within one week of their promulgation.

To assist you in writing and completing a COVID-19 Control Plan, a business may obtain a checklist and a template at www.reopeningri.com. Non-critical retail establishments must complete and sign the checklist by Monday, May 11, to reopen by then; non-critical retailers must complete the COVID-19 Control Plan template by Monday, May 18.

All businesses currently operating must complete the COVID-19 Control Plan template by May 18 in order to continue operations.

To ask questions about the COVID-19 Control Plan, checklist, and template, please email: covidplan@reopeningri.com.

I. Summary of Phase I Operations

Under Phase I of Rhode Island’s economic re-opening plan, some business and social activity will resume on a limited basis while significant restrictions remain in place to protect public health and safety.

Businesses must plan to adopt practices compliant with newly promulgated state rules and regulations from the Rhode Island Department of Health and the Rhode Island Department of Business Regulation, as well as recent executive orders and with any sector-specific regulations.

- Emergency rules and regulations promulgated by the Rhode Island Department of Health can be accessed online at: https://health.ri.gov/covid/
- A full list of executive orders can be found at: https://governor.ri.gov/newsroom/orders/
- Emergency rules and regulations promulgated by the Rhode Island Department of Business Regulation can be accessed online at: https://dbr.ri.gov/covid/covid19updates.php
- Sector specific guidance for business re-opening under Phase I, such as retail specific guidance, can be found at https://www.reopeningri.com/

The guidelines below offer businesses eligible to operate in Phase I general guidance that should be considered the minimum to help protect their employees, customers, and residents of the state.

Businesses can determine their eligibility for re-opening under Phase I by consulting the executive orders posted here.

II. Space and occupancy limits

All organizations must follow the regulations issued by the Rhode Island Department of Health (RIDOH) and the guidance issued by the Centers for Disease Control and Prevention (CDC) regarding gathering sizes and social distancing.
Adhere to gathering size restrictions

- Businesses must comply with the RIDOH regulations, found here, and active executive orders, found here.
- These rules must be followed when holding meetings, conferences, or other social gatherings.

Apply social distancing measures

- All persons should remain at least six (6) feet apart at all times. If social distancing is not feasible, individuals must minimize time in violation of social distancing, and additional precautions should be taken. Procedures that cannot be executed with social distancing should be documented by businesses in the written COVID-19 Control Plan required under section III of this document.
- All persons must wear a cloth face covering mask in accordance with RIDOH regulations, found here, and active executive orders, found here. Further information on cloth face masks and coverings can be found in later sections of this document.
- The CDC has published the following social distancing guidance:

III. Business processes, procedures and activities

All businesses operating under Phase I should have established cleaning, health screening, and sick leave procedures. Businesses must do the following:

- Businesses must develop a written **COVID-19 Control Plan** outlining how their workplace will prevent the spread of COVID-19 that includes procedures that meet, at a minimum, the requirements of the RIDOH regulations posted here and the following elements:
  - Social distancing procedures;
  - Procedures for ensuring wearing of face coverings;
  - Procedures for decontamination of surfaces;
  - Procedures for responding to a positive case or outbreak. Each organization should have a plan to ensure that employees who are required to isolate based on a positive test for COVID-19, or are required to quarantine as a result of exposure, can stay out of the workplace until cleared to return; and
  - Procedures for minimizing access to the establishment by COVID-19 positive or symptomatic individuals.

- A template for a written COVID-19 Control Plan required under RIDOH regulation can be found at: http://www.reopeningri.com/
- Businesses must make the written plan (or the filled-out template) available to employees and should ensure employees are aware of their role in implementing relevant procedures and protocols.
- This plan does not need to be submitted to a state agency for approval but must be made available to the Department of Health in the event of an inspection or outbreak.
- Businesses must place posters educating employees, customers, and visitors about how to protect themselves in accordance with RIDOH regulations found here: https://health.ri.gov/covid/
  - Posters must be placed at entrances and in common areas (such as bathrooms.)
A list of acceptable posters available for download can be found at: 
https://health.ri.gov/covid/for/business/

Enhanced cleaning and/or disinfecting procedures

Enhanced cleaning and disinfecting procedures appropriate to each type of business must be implemented.

**Cleaning** refers to the removal of germs, dirt, and impurities from surfaces. Although not designed to kill germs but instead remove them from a surface, most cleaning products can "kill" coronaviruses by removing the fatty outer layer they use to infect cells.

**Disinfecting** refers to using a chemical designed to kill germs on surfaces. This process does not necessarily clean dirty surfaces or remove germs, but by killing any remaining germs on a surface after cleaning, it can further lower the risk of spreading infection.

- The CDC recommends cleaning surfaces with soap and then applying disinfectant.
- RIDOH requires cleanings of business establishments **at least once daily**. In addition, commonly touched surfaces, such as shared workstations, elevator buttons, door handles and railings should be cleaned in accordance with CDC guidance for specific industries, found here: 
- A full list of EPA's approved disinfectants for use against SARS-CoV-2 can be found [here](https).
  - Businesses can prepare a bleach solution by mixing 5 tablespoons (1/3 cup) bleach per gallon of water or 4 teaspoons bleach per quart of water.
- **WARNING**: Never mix bleach with ammonia or any other cleanser.

**Note that these are minimum cleaning requirements** – increased cleaning standards may apply to specific industries dependent on the type of work performed. Sector specific guidance for non-critical retailers be found at [https://www.reopeningri.com/](https://www.reopeningri.com/); more sector-specific guidance will be available on this website over time.

Access screening procedures

RIDOH requires establishing, at minimum, symptom screening and COVID-19 risk procedures to screen anyone entering a business establishment. People whose responses to screening questions indicate they are sick, or who show visible signs of illness, must be denied entrance and instructed to isolate.

- The Rhode Island Department of Health has published sample screening questions for businesses. Sample screening questions for businesses can be found at:
  - [https://health.ri.gov/forms/screening/COVID19_Employee_Screening_Tool.pdf](https://health.ri.gov/forms/screening/COVID19_Employee_Screening_Tool.pdf)
  - [https://health.ri.gov/otherlanguages/spanish/forms/screening/COVID19_Employee_Screening_Tool.pdf](https://health.ri.gov/otherlanguages/spanish/forms/screening/COVID19_Employee_Screening_Tool.pdf)

- At a minimum, businesses must screen employees and visitors for self-reported symptoms consistent with COVID-19 and other COVID-19 risk factors upon entering the building.

- Screenings can be conducted verbally, by app, by phone, or by another method of the employer’s choosing including, if necessary, the posting of an informational poster that communicates the screening requirements.
• Deny entry to people with COVID-19 symptoms if they can’t be explained by allergies or another non-infectious cause, as listed by the CDC: https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html

• In the event that an employee is identified, pursuant to screening or otherwise, as having acute respiratory illness symptoms or is positive for any other COVID-19 risk factors, or is currently directed to be in quarantine or isolation, the employer should send the employee home and take any additional necessary and appropriate action, in accordance with applicable laws and current RIDOH guidance and regulations.

Businesses may also choose to supplement screening questions with temperature checks. CDC guidance on temperature checks can be found here: https://www.cdc.gov/coronavirus/2019-ncov/community/general-business-faq.html

Any business that experiences a COVID-19 case must cooperate closely with RIDOH to help mitigate the public health impact of the event and guide the exposed individual to appropriate resources.

For more information on COVID-19 testing, please see RIDOH’s website for how to get a COVID-19 test: https://health.ri.gov/covid/testing/. Businesses must respect individual privacy and must not disclose the name of employees who test positive to other employees or the public.

Procedures to respond to cases of illness in the workplace

In the event an employee becomes ill during the workday, they should be sent home immediately. Once a sick employee and those with possible exposure have left the impacted area(s), the area(s) should be closed off for heightened cleaning and disinfection in accordance with CDC protocols and guidelines. This would include, but not be limited to, a deep cleaning of all touchpoints throughout the impacted area and disinfecting all surfaces, including glass.

Having COVID-19 sick leave policies is strongly encouraged and will be critical for the successful implementation of this requirement.

If an employee tests positive, the business should immediately contact RIDOH at 401-222-8022, or 211 after hours, so they can assist in contact tracing and provide further instruction.

Face masks and other personal protective equipment

Under Executive Order 20-30 all employees and visitors are required to wear face coverings.

• Employers must provide appropriate face coverings to their employees. Either a cloth mask or surgical face mask is acceptable. Respirators such as N95 masks should be reserved for designated healthcare workers.

• Employees that require more extensive facial coverings due to industry specific safety regulations, laws or guidelines should continue to comply with the PPE requirements outlined within their respective industry-specific laws, regulations, and guidelines (i.e. medical professionals, professionals who use respiratory equipment, and professionals who handle hazardous waste.)

• Face coverings are required unless an employee and/or visitor can easily, continuously, and measurably maintain at least six (6) feet of distance from other employees and/or visitors for the duration of his or her work and/or time in a building.

• Nothing in Executive Order 20-30 shall require a store or other place of business to refuse entry to a customer not wearing a face covering.

• Such protective face coverings are not required for certain individuals, per CDC guidance, or for:
- Anyone for whom use of such face covering would be damaging to his or her health; or
- Anyone who is developmentally unable to use such face covering, including young children who may not be able to effectively wear a face mask; or
- When a face covering would inhibit an activity of daily living (e.g. eating); or
- When a face covering would itself negatively impact the safety of an individual or lead to an increased risk of harm to others (e.g. near open flames); or
- Face coverings are not required in settings where people can easily and continuously maintain at least 6 feet of distance from other people.

- Further guidance on the use of face coverings can be found here: https://commerceri.com/masks/
- For further guidance on accommodations for those with disabilities, please contact the Governor's Commission on Disabilities using the contact us page at http://www.gcd.ri.gov/

Access to cleaning materials and hand hygiene

Businesses must provide employees with cleaning/disinfecting wipes and/or cleaning materials so that commonly used surfaces can be wiped down (for example, for their workstation or a cash register.)

- Disinfecting products approved by EPA are preferred.
- Any cleaning product permitted by OSHA is acceptable.

Businesses must also ensure that any individual who enters the business premises has ready access to a handwashing station with soap and running water and/or hand sanitizer at all times.

- Businesses must provide employees with time to wash hands often if sanitizer is not provided.
- Employees should wash their hands often with soap and water for 20 seconds.
- Employees must always wash hands immediately after removing gloves and conducting cleaning procedures.
- If soap and water are unavailable and hands are not visibly dirty, a hand sanitizer that contains at least 60% alcohol may be used.
- If hands are visibly dirty, always wash hands with soap and water.

Guidelines related to travel

All non-essential business travel is strongly discouraged. All business travelers must comply with the executive orders issued by Governor Raimondo. A full list of all executive orders can be found online at: https://governor.ri.gov/newsroom/orders/

Clear communications plan

Businesses are encouraged to develop a communications plan to explain the aspects of its Phase I operations to staff, visitors, community members, and other target audiences (e.g. businesses) as appropriate. Furthermore, businesses should:

- Determine appropriate materials and channels for communicating information. Examples include:
  - Developing and disseminating a one-pager on its Phase I operations.
  - Posting information and FAQs to its website.
- Sharing information on social media.
- Developing and sharing screening tools and signage for public buildings and businesses.
- It also strongly recommended that businesses consider developing materials accessible to the deaf, hard-of-hearing, and the visually impaired.

- Translate information in the languages most prevalent in the business’ community.
- Continue to emphasize the importance of employees staying home if they are sick.

Businesses are required to post posters describing the businesses rules for wearing of cloth face coverings, social distancing of 6 feet apart between parties, and specifying, at the entrance of facilities, that sick individuals should stay home. Posters encouraging healthy handwashing habits, in addition to the above posters, are recommended in common areas and near handwashing facilities.

A list of informational posters for businesses can be downloaded at: https://health.ri.gov/covid/for/business/

IV. Human resources

Guidance to minimize spread of COVID-19 among employees

Businesses must have a minimum of one representative (such as a business manager, business owner, or HR representative) appointed to work with RIDOH on testing employees, contact tracing, case investigation, isolation and quarantine, and any other follow-up related to outbreak containment.

Additional precautions for vulnerable populations may be required. Businesses are required to comply with the Pandemic Preparedness in the Workplace and the Americans with Disabilities Act, which has been recently revised to address its application to COVID-19 and can be found here: https://www.eeoc.gov/laws/guidance/pandemic-preparedness-workplace-and-americans-disabilities-act

Furthermore, businesses are encouraged to maintain consistent work crews and mitigate the number of other employees that each employee is exposed to in the workplace to the furthest extent feasible. Suggested workforce management practices for businesses to minimize the spread of COVID-19 among employees include:

- Organizing work crews into “teams” or “pods” that do not interact to mitigate the risk of transmission.
- Staggering shifts or flexing work schedules to allow for fewer employees in any given workspace at any one time.
- Closing communal spaces where possible (break rooms, conference rooms, etc.)

Training plans in order to meet the safety guidelines proposed in the previous sections

Each organization is strongly encouraged to develop a training plan to ensure that employees are able to meet the safety guidelines in accordance with OSHA requirements and those requirements described throughout this guidance document. Businesses may include their COVID-19 related training plans in their COVID-19 Control Plan.

Additional resources can be found at: https://www.eeoc.gov/laws/guidance/pandemic-preparedness-workplace-and-americans-disabilities-act
V. Supplies

Supplies needed for Phase I

Supplies required for all organizations during Phase I include:

- Face masks (cloth or surgical face masks are acceptable.)
- EPA approved disinfectant solutions or other general cleaning supplies (spray bottles, bleach, surface cleaners, etc.)
- Materials for handwashing stations (soap and running water) and/or hand sanitizer bottles at workstations.

Suggested, but not required, supplies include:

- Disinfectant wipe stations near communal objects.
- Thermal cameras or no-touch temperature measuring stations.
- Signage on capacity limits (on the exterior of the building.)
- Individually distributed cleaning supplies for employees to encourage cleaning of personal workspaces (desks, cubicles, workstations, check-out areas, cash registers, etc.) This is in addition to the required general cleaning supplies that must be made readily available to employees.
- Plastic, plexi-glass, or other physical barriers where appropriate and feasible.

RIDOH recommends glove use only in settings that already require glove use (e.g. healthcare settings, food preparation).

VI. Certification and enforcement

Certification guidelines for reopening

- Executive Order 20-09, issued by Governor Raimondo on March 22, 2020 and extended by Executive Order 20-23 on April 10, requires all businesses remaining open, to the extent practicable, to implement CDC guidance on social distancing, hygiene and sanitation measures.
- In furtherance of the Executive Order 20-09 directives, the Rhode Island Department of Business Regulations issued guidelines for retail and grocers on March 26, 2020.
- The Rhode Island Department of Health submitted draft regulations that correspond with this guidance on 5-6-2020. Those can be accessed online here.

A full list of all executive orders can be found online at: https://governor.ri.gov/newsroom/orders/

VII. Other considerations

Below is a list of additional resources for businesses on COVID-19 related guidance and planning:

- Ensure your HVAC system is operating effectively and consider increasing the supply of outdoor air through your HVAC system.
  - Guidance on COVID-19 and HVAC systems is available from ASHRAE
- The Rhode Island Manufacturers Association (RIMA) has published a COVID-19 Response Pledge that can be found here: Guidelines for Plant Safety for Manufacturers.
- The CDC publishes regular guidance on cleaning and disinfecting community facilities.
- The EPA has published a list of responses to frequent COVID-19 related questions
• Regular updates on COVID-19 and safety precautions are published on the Rhode Island Department of Health’s website at https://health.ri.gov/covid/

• More detail on the State of Rhode Island’s reopening plan can be found at: https://www.reopeningri.com/

• For further guidance on accommodating for those with disabilities, please visit the Governor’s Commission on Disabilities’ website at http://www.gcd.ri.gov/

• Further detail on OSHA guidance and workplace safety rules and regulations can be found at: https://www.osha.gov/SLTC/covid-19/
